Education

12th
2021

CBSE , English
Grade - 85-89.9%

Projects

Reposcan: Academic integrity verification system
5 Months

Developed a sophisticated, high-performance plagiarism detection system to ensure academic integrity. The project bridges the gap between traditional lexical (string-based) matching and deep semantic analysis by implementing a robust, multi-layered NLP pipeline. This system is designed to identify not only verbatim copying but also sophisticated paraphrasing, which often eludes conventional tools.

Ewagon: Miniature Toy E-Commerce Website
4 Months

Developed a full-stack e-commerce platform for collectible miniature toys and die-cast vehicles using HTML5, CSS3, JavaScript, Bootstrap, Flask, and SQLite. Implemented secure user authentication, product management, shopping cart, payment gateway integration, and responsive UI for seamless user experience across devices.
